Jan 14th - Session 2 - Group 11

To edit: View options - Annotate

Have commercial alley spill out to the area...making it an entrance walkway
Tab

Somehow Use river in a way that the space mirrors the water or brings in a sea theme

Ecosystem, agriculture, permacultur
More building than open space
Active streetscapes/buildings along edges
Not one big park
Diversity of spaces, many different spaces
Diversity of uses, housing mostly
Indoor-outdoor spaces
Indoor public space
Winter garden
Many places to sit for free
Elements of play
Really good architecture and urban landscape design - not traditional or contemporary, just extraordinary tha fits Portsmouth, do not let HDC revie this project.

terracing/amphitheatre with small performance space

Tables and umbrellas, benches

Sculpture ? Trees for shade and texture. Plantings throughout...

Limit surrounding three stories.

play area/small play structure
seating/benches
(all season) trees, plants,

Limit the height of surrounding structures to the '"traditional" three stories, i.e. not an inflated

Avoid slavish imitation of old buildings. Good modern design is better.

What is your vision for incorportating a vibrant urban street life with land use patterns and buildings that promote a unique place that draws children and families to it.

Farmer's market indoor/outdoor
Performing spaces
rotating Art

Definitely solar PV
Living walls...
Bus stop
View of churches
Perhaps church view

Paths, benches, play area for both children and adults (families). Elements of nature for all seasons - evergreen plantings.

Large space for children and families...perhaps with large toys or water feature children can play in

-integrate/close-off Penhallow
-historic markers/interactive
- if there are new buildings then they should reflect "old" Portsmouth and be on Bow St. away from McIntyre

A welcoming space for ages 8-80, with one of more features where children can play (water feature?) while parents watch — and allowing for a diversity of people — people in outlying neighborhoods having some kind of shuttle stop (seniors especially) — must include inexpensive food and drink.

Elements of nature including terracing, organic shapes (echoing new Brick Market development around the corner), possible vertical greenery, shade trees.

Convert Penhallow to public space. Shady or covered places to play; no rain/snow. Benches and tables. Something for children to climb. Maintain views of Bow St restaurants, church. Brick.

Net Zero energy use, carbon nutral construction and operation.

Whole site achieving highest sustainable practices.

Resilient and adaptable to changing climate conditions.

Pedestrianize Penhallow with access only for emergency, delivery, and transit vehicles - planters and speed tables to slow traffic, bike racks, something to amuse children. Maybe with art or elements that celebrate our 400th anniversary.

Closing all or part penhallow to cars- focus to slow/reduce traffi -Ped Friendly
-emergency, delivery, and transit vehicles

Bike friendly
-Bike racks

Incorporated a play area or sculpture -Childrens space
-Benches & Picnic tables, A water Feature?

Net-Zero/Carbon neutral

Limit surrounding buildings and structures to 3 stories to preserve views

views of bow street/ the Church

Diversity of uses - housing (low/middle class, not lux)
Smaller units - Bachelor/1bed? /dining/retail/business
Public space indoors

Incorporate historic markers - Portsmouths 400th ann.

Art

Good arch-
Bringing in views and influence from the river and the brick market development
-Reflect old portsmouth

Shuttle service to promote use and ease of access

Resilient to climate

Trees/plants for shade - Terraced plants.

Performing space/Outdoor performing space
-Ampitheater

Vibrant street life.
