Daily Trend for New Cases

New Cases per 100K over 14 days

The graph above shows the total daily number of COVID-19 tests reported in NH, and of those tests, how many were positive each day. The trend line in blue shows the average percentage of tests that were positive over the last 7 days.

Note: DHHS changed the map above to show the number of new cases per 100k people over the last 14 days to create shading gradients between counties
