**715**  
Total Deaths

**Total Deaths by Age** | **Daily Trend for New Cases** | **New Cases per 100k over 14 days**

The graph above shows the total daily number of COVID-19 tests reported in NH, and of those tests, how many were positive each day. The trend line in blue shows the average percentage of tests that were positive over the last 7 days.

Note: DHHS changed the map above to show the number of new cases per 100k people over the last 14 days to create shading gradients between counties

 US MAP (right) source: <https://www.nytimes.com/interactive/2020/us/coronavirus-us-cases.html#map>  
 Current US Hot Spots (at right) Darker shading = more cases. On Nov. 18, the color scale on the hot spots map was expanded to reflect the new record rates of infection. The map was also changed so that areas with very low population density are now shaded.
